ONE PLATFORM. COMPLETE BUSINESS CONTROL.

FieldFlow

Your business.
Your people.
Your operations.

One connected workspace for field operations, workforce, stock, fleet and financial administration.

BUSINESS OPERATIONS | WORKFORCE MANAGEMENT | STOCK CONTROL | FINANCIAL ADMINISTRATION

One full-featured Core.

Included in every subscription tier.

01 / THE OPERATION

From first enquiry to finished work.

Keep customer details, estimates, crews and job records connected through the day-to-day service workflow.

Customer CRM & site details › **Quotation** Materials & labour › **Job card** Crew & work record › **Invoice** Actuals & sign-off

01 Company accounts & access

One universal company account across Operations and Workforce. PIN/password access, five role types, per-user feature restrictions, site permissions and active/disabled status.

02 Dashboard & daily navigation

Responsive desktop/mobile interface, central module navigation, light/dark/high-contrast themes, operational summaries, record statuses and workflow shortcuts.

03 Client & customer records

Company and contact details, billing and physical addresses, notes, linked job cards and work history available throughout the operational workflow.

04 Quotations & costing

Branded printable quotes with material quantities, discounts, estimated labour, hourly rates, travel, sundries, consumables and VAT. Eligible stock can be checked, reserved, released or deducted as the quote progresses.

05 Job cards & field operations

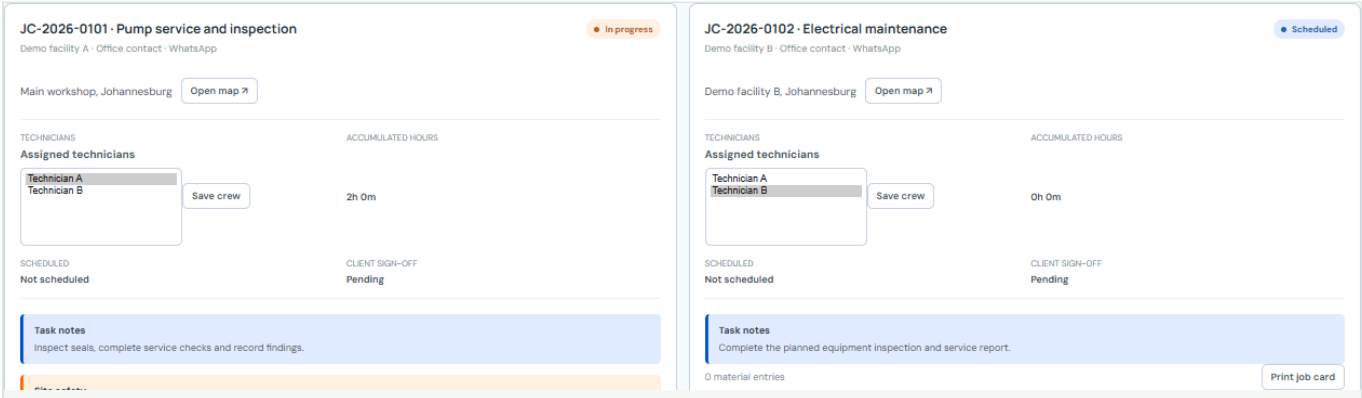

Create manually or from a quote. Schedule work, assign multiple technicians, record site/GPS details, instructions, safety notes, materials, progress and completion.

06 Attendance, job time & sign-off

Keep shift attendance separate from job stamps. Support vehicle-linked shifts, applicable GPS/geofence checks, accumulated job hours, customer signatures and approval verification.

07 Invoicing

Prepare invoices from signed work using actual labour hours, materials and additional charges. Includes VAT calculations, duplicate prevention and branded print layouts.

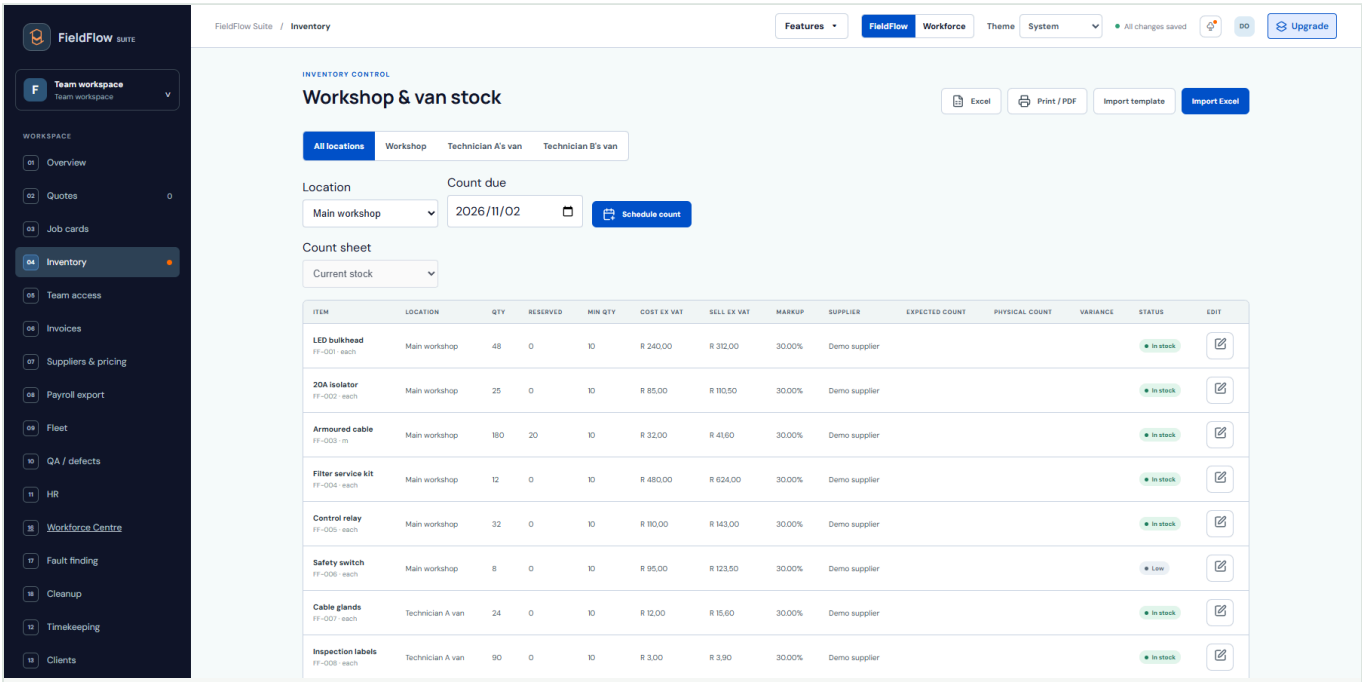

FIELD FLOW CORE — Job management · sample workspace

02 / STOCK & SERVICE

Know what you have. Know where it works.

Bring warehouse and vehicle stock, supplier information, maintenance records and inspection follow-up into the operational picture.

WORKSHOP & VAN STOCK

FieldFlow Core · sample workspace

Inventory & stock

Multiple locations, workshop/vehicle quantities, availability and reservations; minimum levels and low-stock indicators; spreadsheet imports; pricing and supplier links; auditable adjustments with reasons.

Stocktaking & audits

Dated count sheets per location with expected and physical quantities, variance calculations, drafts, completion controls, assigned ownership, Excel and printable exports.

Supplier information

Supplier contacts and lead times, preferred-item codes, cost history, global markup and configurable VAT treatment for new documents.

Fleet management

Vehicle register, odometer entries, service intervals, fuel logs, maintenance history, replacement spares and individual vehicle records.

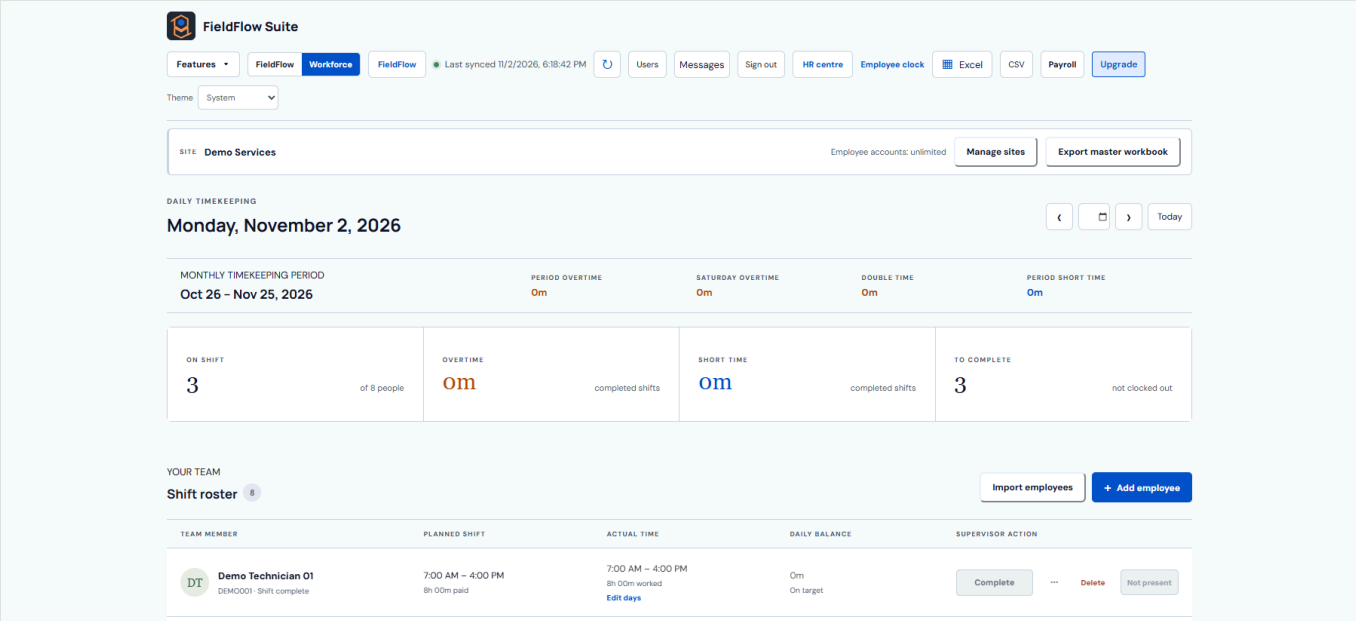

Quality assurance & rework

Pre/post-job inspections, pass/fail results, scores, defect photos and severity, linked rework jobs and close-out verification.

Control with a trail. Stock edits retain change reasons and audit history. Physical counts record variance; completion does not automatically reconcile live stock.

A clearer picture of the working day.

Coordinate rosters, attendance, HR records and monthly hours across the sites your users are authorised to access.

WORKFORCE MANAGEMENT

FieldFlow Core · sample workspace

13

Workforce & multi-site

Authorised operational sites, separate rosters, monthly attendance periods, employee spreadsheet imports, configurable shift defaults and centralised administration.

14

Employee self-service

Personal attendance and permitted HR records, applicable GPS/photo clocking, acknowledgements and access limits based on employee permissions.

15

HR & leave administration

Leave applications, balances, approvals and cancellation; supporting certificates and expiry controls; legal appointments, disciplinary history, appraisals and protected attachments.

16

Monthly hours & payroll preparation

Manual hours and overtime classifications, public holidays, combined field/site totals, employee matching, open/overlap checks, CSV and workbook exports, attendance and multi-site reports.

reviewed time summaries

04 / RECORDS & CONTROL

Useful records. Clear boundaries.

Core brings practical administration together while keeping statutory, external-provider and specialist responsibilities clear.

SARS & statutory preparation

Payroll period management, reviewed employee figures, UIF/SDL settings, EMP201 preparation totals and IRP5 source summaries.

Bookkeeping & financial reports

Chart of accounts, protected opening balances, debtor/creditor transactions, balanced journals, trial balance, profit-and-loss and balance-sheet reports.

Internal communication & tasks

Site-specific address books, internal messages, threaded replies, read/unread tracking and recipient-controlled open/completed task status.

AI-assisted fault finding

Trade-eligible text/photo questions, camera and image upload, consent, image validation and provider/usage safeguards.

Company documents & branding

Legal/trading names, registration and VAT numbers, business contacts/address, logo details and branded operational print layouts.

Administration & system controls

Permission-guarded data cleanup, reference/history safeguards, private configuration, retention controls and module entitlements.

BUILT FOR OPERATIONAL CLARITY

Preparation and records, not a substitute for review.

Payroll / SARS	Preparation tools, not filing or statutory submission.
Bookkeeping	Not automatic reconciliation of every operational invoice or bank receipt.
Integrations	Google Places, AI, email and WhatsApp need configuration and live validation.
Offline use	Available only for supported workflows; not every function works offline.

THE NEXT LAYER · PROPOSED

Specialist work. The same connected suite.

Industry-specific packages are separate proposed modules. Descriptions and prices below are planning information, not confirmation of release or activation.

CLUBS · FITNESS · RECREATION

ClubFlow

Membership, family records, activity reservations, equipment checks and access-control workflows, designed around the club you run.

From R1,150 / month

One type; extra types +R350, or all-types bundle R2,150.

SALES · MARKETING · LEADS

MarketFlow

Campaign and lead workflows linking social leads, attribution, local publishing, review management, quote follow-ups and shared messaging.

R1,150 / month

Full specified scope; no extra per-mode fee specified.

MULTI-BRANCH RETAIL

RetailFlow

Branch stock, product variants, barcode labels, inter-branch transfers and e-commerce workflows, without replacing your existing till.

R1,150 / month

Full specified retail scope.

HOSPITALITY · LODGES

LodgeFlow

Guest stays, reservations, housekeeping and property records, with proposed guest-folio and booking-channel workflows.

From R1,350 / month

One type; +R200 per additional type.

CONSTRUCTION · PROJECTS

BuildFlow

Construction quantities, stage billing, variations, drawings, subcontractors, site quality records and snagging workflows.

R1,450 / month

One complete construction package.

FARMING · LIVESTOCK · CROPS

AgriFlow

Livestock and crop records, land/irrigation workflows, equipment costing, chemical registers and seasonal farm work.

R1,250 / month

Full specified agricultural scope.

ENGINEERING · FABRICATION

EngFlow

Drawings, bills of materials, workshop routing, material traceability and proposed weld/NDT record workflows.

R1,450 / month

All four specified disciplines.

MANUFACTURING · MRP · OEE

ProdFlow

Industry-shaped production, workstation routing, material reconciliation, quality holds and shop-floor performance workflows.

From R1,650 / month

One type; +R350 per additional type.

UNDERGROUND · SURFACE MINING

MineFlow

Mining-mode records for survey, fleet, geotechnical and environmental work, with proposed safety observations and action sign-offs.

R2,450 / month

One type; both types R3,100 / month.

Proposed modules, not released features. Specialist engines, connectors, offline behaviour and statutory/safety functions require development, professional review and acceptance testing.

ONE COMPLETE CORE · USER-BASED PRICING

The same foundation at every team size.

Every subscription tier includes the full FieldFlow Core. Included-user allowance and additional-user rate vary by plan.

CORE PLAN	MONTHLY	USERS INCLUDED	EACH EXTRA USER
Starter Small Team	**R1,450**	10	R120 / month
Business Operational Standard	**R3,850**	35	R95 / month
Enterprise Heavy Industry	**R8,900**	100	R70 / month

Optional Standard Tenant Setup: R3,500 once-off for database setup, PDF branding, data import and a live team walkthrough. Final availability, VAT treatment and any external provider charges are confirmed in a quotation.

YOUR BUSINESS. YOUR PEOPLE. YOUR OPERATIONS.

One platform.
Built around your work.
